GENERAL DESCRIPTION

OVERVIEW

This product is a 14.1" TFT Liquid Crystal Display Module with a Backlight unit and 20 pins LVDS (Low Voltage Differential Signal) interface. This module supports 1024 x 768 XGA mode and can display 262,144 colors. The inverter module for Backlight is not built in.

The connector information of Black light unit.

Pin	Symbol	Description	Remark
1	HV	Lamp power input	Red
2	LV	Ground	White

Connector Part No.: BHSR-02VS-1(JST)

User's connector Part No.: SM02B-BHSS-1-TB (JST)

Note (1) The operating temperature range is 0 ~ 50 °C , and the typical value of Power Supply Current is measured in black pattern.

Note (2) Measure conditions

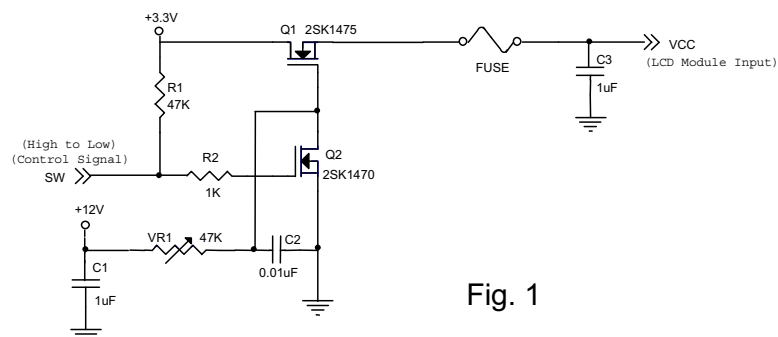

Fig. 1

VCC rising time is 470us

Note (3) Lamp current is measured by utilizing a current meter for high frequency as shown below:

Note (4) The voltage shown above should be applied to the lamp for more than 1 second after startup. Otherwise the lamp may not be turned on.

Note (5) The lamp frequency may produce interference with horizontal synchronous frequency from the display, and this may cause line flow on the display. In order to avoid interference the lamp frequency should be detached from the horizontal synchronous frequency and its harmonics as far as possible.

Note (6) $P_L = I_L \times V_L$.

Issue Date: Mar. 01, 2001
Model: N141X203

Approval

Note (7) The lifetime (Hr) of a lamp can be defined as the time in which it continues to operate under the condition $T_a = 25 \pm 2^\circ\text{C}$ and $I_L = 6.0 \text{ mArms}$ until one of the following event occurs:

- (1) When the brightness becomes 50% or lower than its original,
- (2) When the effective ignition length becomes 80% or lower than its original value.
(Effective ignition length is defined as an area that has less than 70% brightness compared to the brightness in the center point.)

Note (8) The waveform of the voltage output of inverter must be area-symmetric and the design of the inverter must have specifications for the modularized lamp. The performance of the backlight, such as lifetime or brightness, is greatly influenced by the characteristics of the DC-AC inverter for the lamp. All the parameters of an inverter should be designed with care so as not to produce too much current leakage from high-voltage output of the inverter. When designing or ordering the inverter, please make sure that a poor lighting caused by the mismatch of the backlight and the inverter (miss-lighting, flicker, etc.) never occurs. When the above situation is confirmed, the module should be operated in the same manners as it is installed in your instrument.

3.4 POWER UP/DOWN SEQUENCE

Timing Specifications:

$$0 \leq t1 \leq 10\text{mS}$$

$$0 \leq t2 \leq 50\text{mS}$$

$$0 \leq t3 \leq 50\text{mS}$$

$$t4 \geq 1\text{S}$$

$$t5 \geq 170\text{mS}$$

$$t6 \geq 200\text{mS (min.)}$$

Notes: 1. Please avoid floating state of interface signal at invalid period.

2. When the interface signal is invalid, be sure to pull down the power supply for LCD Vcc to 0V.

4. OPTICAL SPECIFICATIONS

The following optical specifications shall be measured in a dark room or equivalent state (ambient luminance ≤ 1 lux, and at room temperature). The measurement must be taken after backlight warming up for 20 minutes. The operation temperature is $25^{\circ}\text{C} \pm 2^{\circ}\text{C}$. The measurement method is shown in Note (1).

Parameter		Symbol	Condition	Min.	Typ.	Max.	Unit	Note
Central Luminance		L	Center,I _L =6.0mA	120	150	-	cd/m ²	(1), (2), (4)
Contrast ratio		CR	Center	150	200	-	-	(1), (3)
Viewing Angle	Horizontal	θ _x +	Center CR ≥10	40	45	50	degree	(1), (4)
		θ _x -		40	45	50		
	Vertical	θ _y +		10	15	20		
		θ _y -		30	35	40		
Average Luminance		L _{AVE}	I _L = 6.0mA	110	140	-	cd/m ²	(1), (5)
Brightness Uniformity		Buni	θ _x = θ _y = 0 °	1.0	1.4	1.6		(1), (6)
Response Time	Rising	T _R	Center	-	15	30	ms	(1), (7)
	Falling	T _F	θ _x = θ _y = 0 °	-	35	50	ms	
Chromaticity		X _w	Center θ _x = θ _y = 0 °	0.290	0.310	0.330		(1), (8)
		Y _w		0.310	0.330	0.350

		X _G		0.277	0.297	0.317		
		Y _G		0.550	0.570	0.590		
		X _B		0.129	0.149	0.169		
		Y _B		0.104	0.124	0.144		

Note (1) The method of optical measurement:

Issue Date: Mar. 01, 2001
Model: N141X203

Approval

Note (2) Definition of Central Luminance (L):

Central Luminance must be measured at the central point of the LCD module and at the viewing angle of the $\theta_x = \theta_y = 0^\circ$ (Note 4).

Note (3) Definition of Contrast Ratio (CR):

Contrast ratio measurement must be made at the viewing angle of the $\theta_x = \theta_y = 0^\circ$ (Note 4) and at the central point of the LCD module. The Luminance (Note 2) shall be measured with all pixels in the viewing field set initially to be white state, then black state.

$$CR = \frac{\text{Luminance with all pixels in white state}}{\text{Luminance with all pixels in black state}}$$

Note (4) Definitions of Viewing Angle ($CR \geq 10$):

Note (5) Definition of Average Luminance:

The Average Luminance is defined as arithmetic mean value of five spots across the LCD surface at white state. The Luminance (Note 2) shall be measured with all pixels in the viewing field at white state. The measuring spots must be taken at the locations shown in the following figure, where $a = b = 15\text{mm}$.

$$L_{AVE} = \frac{L1 + L2 + L3 + L4 + L5}{5}$$

14/20

Version 3.0

Luminance Measuring Points

Note (6) Definition of Brightness Uniformity (Buni):

$$\text{Buni} = \frac{\text{Maximum luminance of 5 points}}{\text{Minimum luminance of 5 points}} \quad (\text{Note 5}).$$

Note (7) Definition of Response Time:

The Response Time is set initially by defining the " Rising Time (T_R)" and the " Falling Time (T_F)" respectively. T_R and T_F are defined as following figure.

Issue Date: Mar. 01, 2001
Model: N141X203

Approval

Note (8) Definition of Chromaticity:

The color coordinates (Xw, Yw), (XR,YR), (XG,YG), and (XB,YB) are obtained with all pixels in the viewing field at white, red, green, and blue states, respectively.

5. MECHANICAL DRAWING

Please refer to the attached drawings.

6. PRECAUTION

6. 1 ASSEMBLY AND HANDLING PRECAUTION

- (1) Do not apply rough force such as bending or twisting to the module during assembly.
- (2) To assemble or install module into user's system can be only in clean working areas. The dust and oil may cause electrical short or worsen the polarizer.
- (3) It's not permitted to have pressure or impulse on the module because the LCD panel and backlight will be damaged.
- (4) Always follow the correct power sequence when LCD module is connecting and operating. This can prevent damage to the CMOS LSI chips during latchup.
- (5) Do not pull the I/F connector in or out while the module is operating.
- (6) Do not disassemble the module.
- (7) Use a soft dry cloth without chemicals for cleaning, because the surface of polarizer is very soft and easily scratched.
- (8) It is dangerous that moisture come into or contacted the LCD module, because moisture may damage LCD module when it is operating.
- (9) High temperature or humidity may reduce the performance of module. Please store LCD module within the specified storage conditions.
- (10) When ambient temperature is lower than 10°C may reduce the display quality. For example, the response time will become slowly, and the starting voltage of CCFL will be higher than room temperature.

6.2 SAFTY PRECAUTION

- (1) The startup voltage of backlight is approximately 1000 Volts. It may cause electrical shock while assembling with inverter. Do not disassemble the module or insert anything into the backlight unit.
- (2) If the liquid crystal material leaks from the panel, it should be kept away from the eyes or mouth. In case of contact with hands, skin or clothes, it has to be washed away thoroughly with soap.

8. DEFINITION OF SHIPPING LABEL ON MODULE

The barcode nameplate is pasted on each module as illustration, and its definitions are as following explanation.

(1) Model Name : N141X203

(2) Revision : Rev.XX, for example : C1, C2 ...etc.

(3) Serial ID Example : 0 4 C 1 0 3 2 0 3 9 1 0 0 0 1

Serial ID include the information as list.

1. Manufactured Date : Year : 0~9, for 2000~2009

Month : 1~9, A~C, for Jan. ~ Dec.

Day : 1~9, A~Y, for 1st to 31th, exclude I and O and U

2. Revision Code : cover all the change

3. Model code

4. Serial No. : Manufacturing sequence of product

5. Product Line : 1 -> Line1, 2 -> Line 2 ...,etc.
